Ask about WiFi  
when ordering.

\*With any standard tall drink purchase.  
Extra's will incur a charge.

## How to get online at Zarraffa's Coffee

Your computer may connect to Zarraffa's Coffee WiFi automatically, if it doesn't, just follow the steps below.

- 1 Ensure your wireless device is enabled.
- 2 Open your wireless connection device or program and view available wireless networks.
- 3 Select the 'Zarraffa's' network you see available, by double clicking on the icon. 'Zarraffa's' will be followed by the store name.
- 4 Launch your web browser and enter the username and password provided on your Zarraffa's Coffee WiFi receipt into the landing page.
- 5 Observe the time limit (enabled without pop up blockers) and enjoy Googling over your Grande Caramelised Cappuccino.

## FAQ

### What is WiFi?

WiFi is short for wireless fidelity and is the radio frequency standard that is used to connect devices, such as computers, together using a wireless connection.

### What Zarraffa's Coffee stores have WiFi?

Simply visit [www.zarraffas.com](http://www.zarraffas.com) to find out what stores in your region have WiFi. You will see stores with WiFi marked with this symbol:

### How secure is the Zarraffa's Coffee WiFi network?

Zarraffa's Coffee WiFi offers client isolation. This means wireless clients are unable to "see" each other. Each wireless connection is private, preventing wireless hackers from attacking other wireless users' computers.

The Zarraffa's Coffee WiFi network also has VPN pass-through. VPNs (virtual private networks) secure private communications over public networks. Once authenticated, end-users utilising corporate VPNs can seamlessly establish secure connections between their client device (usually a laptop) and their company network via the wireless hotspot.

### Are there any conditions of use?

Yes, for the full terms and conditions please visit [www.zarraffas.com/wifi-terms.html](http://www.zarraffas.com/wifi-terms.html)
